### Capacitive Sensors Dielectric Constant

For capacitive sensors, its detecting objects with different dielectric constant have different sensing distance and sensitivity.

The bigger dielectric constant, the longer sensing distance it can get.

## Mounting Method-Shielded,unshielded

**Shielded mounting proximity sensors**

Sensing surface must be flush with metal surface

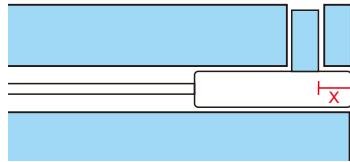

**Unshielded mounting proximity sensors**

The distance between sensing surface to surrounding metals must be more than 2 times sensing distance

## Mounting Torque

**Cylindrical**

- 1.φ3/3.4/4:Fix the sensing head with a screw at 7mm where it is near the pointed part ;
- 2.φ6.5 Shielded mounting: Fix the sensing head with a screw at 8mm where it is near the pointed part ;
- 3.φ6.5 Unshielded moounting:Fix the sensing head with a screw at 12mm where it is near the pointed part.
